

Phytonyx 2018 Seed Selections

Premium Hemp Strains
Feminized Seeds
Growing for the World

Canna Blush

Rosy & magenta pistils are showcased in late summer on the flowers of this beautiful strain. A robust, fruity terpene profile tends towards grape, while an abundance of trichomes make this strain glisten in the Autumn sun. CBD content ranged from 12-15%.

CBDawg

CBDawg has a compact, dense flower loved by the connoisseur. Horizontal spread often exceeded height, making this one of our heaviest yielders in 2017. Excellent CBD content, from 14-18% in our 2017 crop.

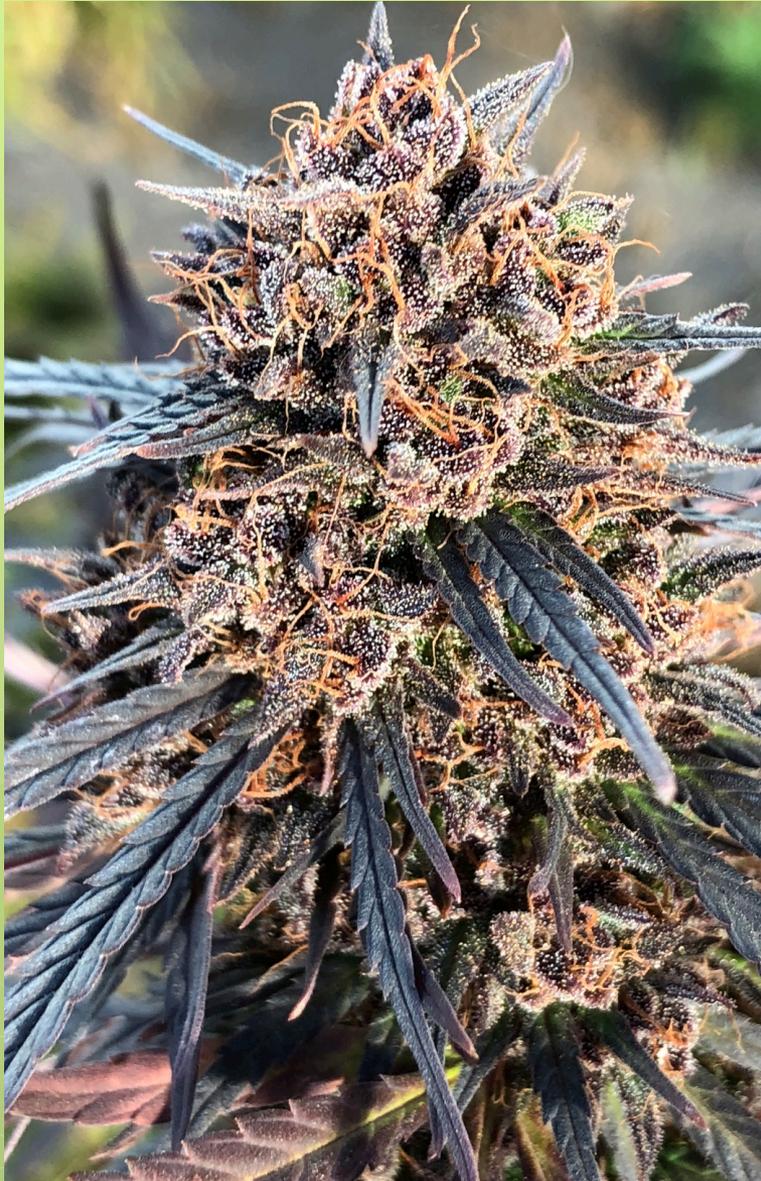

Citrus Fire

A compact, stout structure made plants of this strain hardy in the face of the late autumn elements. Pungent citrus with spicy undertones are expressed in the terpene profile. CBD content ranged from 13-16% in our 2017 crop.

Frosty Lime

Lengthy spears stacked with frosty lime green buds make this strain a favorite. Terpene profile is fruity, evoking watermelon and bubble gum. One of the later of our early finishing strains, these plants can grow to large stature, leading to heavy yields. CBD content 12-15%

Purple Gas

Early finishing strain, with classic diesel terpene profile. This strain runs from light purple to deep indigo, has a 14-17% CBD content, and was one of our biggest yielders in 2017.

Siskiyou Gold

Massive buds dripping with resin are characteristic of this strain, while it's open, airy flower structure provides excellent mold resistance. Mature and ready to harvest by the second week of October, we named this strain after the mountain range our farm is overlooked by. CBD content 14-16%

The Genesis Factor

- Our pollen donors for the 2018 crop were selected from our best early finishing strains with flavorful terpene profiles, high CBD ratios, and large yields. We look forward to further refining and stabilizing the strain characteristics that helped gain our hemp farm wide acclaim in 2017 as the best in our region.

New Strains – Coming in 2019

Phytonyx is working with European and Asian partners to introduce 4 new strains for 2019. These strains are amazing, and we will be running field trials in 2018.

- OG Kush CBD
- Bubba Kush Hemp
- Blueberry Hempband
- Bhangzu Chronic

Contact us for further info if you want to get access to these strains for 2019.

Thank you for your interest!
