

ENRICHMENT SYSTEMS

NANOBUBBLES MADE SIMPLE

PORTABLE I50

The ENRICHMENT SYSTEMS™ Portable Dissolved Oxygen Unit is one of the industry's most powerful and cost-effective systems. A submersible unit optimized for indoor facilities and greenhouses. The ES Portable efficiently saturates irrigation water with oxygen Nanobubbles improving the delivery of oxygen to the root zone while enhancing plant health and increasing yield.

FEATURES:

- Commercial Grade High Output pump can charge reservoirs up to 5000 gallons
- Increases Dissolved Oxygen Levels Up to 500% - 600%
- Accelerated vigor, healthier root zone, and boosted plant health
- Lightweight and Portable (Easily transportable to multiple reservoirs)
- Improves water quality by producing highly concentrated oxygenated water
- All components are top commercial/industrial grade
- Reduces Pythium and biofilm levels
- Increased nutrient uptake
- Promotion of beneficial bacteria, suppression of pathogens
- Assembled in the USA

REQUIREMENTS:

- Requires 20 Amp & 120v dedicated circuit

US PATENT

- # 11,344,852

PORTABLE I50

TECHNICAL SPECS

Oxygen Concentrator:
L = 22.6", W = 10.5", H = 33"
(70 Lbs.)

Pump Unit:
L = 23-1/2", W = 7", H = 33",
Weight = (24 Lbs.)

ELECTRICAL REQUIREMENTS

Requires 20 Amp & 120v
dedicated circuit

30 Minute Installation

GALLONS PER MINUTE

80 Gallons Per Unit

DISSOLVED OXYGEN LEVELS

500-600% Increase of
dissolved oxygen levels
