

	<u>New retail</u>
<u>Colorado Extractions Spray Vap</u> - Closed loop Ethanol Recovery system	\$96,343
<u>Colorado Extractions Triple Xtract</u> - Filtration inline with Spray Vap	\$7,577
<u>Colorado Extractions decarb station</u> https://www.coloradoextraction.com	\$7,577
<u>Mobile Mini 10' x 30'</u> - 125 amp electric panel, Two 2 ton AC units with Heater cores, High security, Industrial Hygienist certified. https://www.mobilemini.com/ground-level-offices/extra-wide-ground-level-offices	\$44,500
<u>Container updates</u> - Industrial hygienist certified ethanol lab with safety features including: Ethanol exhaust system, shunt trip breaker tied to an explosive gas detector which shuts down all power except exhaust system. Explosion proof equipment. All new electrical with 120 and 240 V outlets, climate controlled room for heater and chiller, new lighting, stainless steel sink with hot water heater, new walls, floor and ceiling with insulation, serviced A/C units, one stand up freezer, and one chest freezer.	\$67,980
<u>USA Labs XTC-45 Centrifuge</u> - 45 L Stainless steel jacketed centrifuge, 25-30 lbs per run, blast proof motor, -40 C capable, 240 or 3 phase power, can be used inline with a closed loop system, bi-directional agitation, 1500 rpm https://www.usalab.com/usa-lab-45l-jacketed-stainless-steel-centrifuge-xtc-45/	\$14,500
<u>Summit Research filter press, hydraulic ram, and stainless steel cart</u> Pneumatic filtration with speeds up to 8 gal per minute, includes filtration papers. https://summit-research.tech/product/pig-filter/	\$7,668
<u>Orange Photonics Light Lab</u> - Bench top cannabinoid potency testing device. Test flower, biomass, concentrates or finished products for potency. High accuracy and test results in minutes. https://www.orange Photonics.com/	\$13,271
<u>Across International 5L short path</u> - Turnkey 5L short path distillation unit with custom glass pieces for better oil flow through the system and lower vacuum depths. https://www.acrossinternational.com/Ai-5-Liter-Short-Path-Complete-Turnkey-Package-Clear5w.htm	\$10,589
<u>Arometrix fraction finder</u> - Real time monitoring of the distillation process to separate fractions precisely. https://arometrix.com/product/fraction-finder/	\$4,003
<u>Lab Society Terpene Distillation kit</u> - Turnkey steam terpene distillation kit. https://labsociety.com/lab-equipment/buy-terpene-distillation-kit/	\$1,965
<u>Small tools / extraction necessities</u> - Everything required for extraction from soaking, filtration, ethanol recovery, decarb, and distillation.	\$3,000
<u>Post processing / refinement</u> - Extra tools, glassware and media to perform Post processing / refinement if necessary such as: De-gumming, winterization, Brine washing / PH balancing, color remediation, and pesticide remediation.	\$4,000

Remediation tools included

- 5L Heat Mantle
- 5L flask
- Small vacuum pump
- Cold trap w/ connections
- Chromotography column
- Separatory funnel
- Beakers
- PH testing strips
- Small tools

Remediation Media included

- Heptane
- C-Bleach
- Celite
- Magnesium oxide
- De-gumming enzymes
- Magsil PR
- Silica 60 (220 mesh)
- Activated carbon
- T5

Total New Retail	\$282,973
Asking Price	\$175,000

This is a turnkey, certified MED and local compliant, mobile ethanol lab with the potential to process 200-300 lbs per 8 hr shift with two people. All equipment needed to process a cold washed / winterized / decarbed crude oil as well as perform post processing / refinement and distillation. Purchase includes multi day training of all processes. You will learn specific techniques that will achieve a highly desirable "clear" oil that will pass all required MED testing and bring a potency in the 90% range. Cannabis oil processing is a craft that we have spent years experimenting with to produce high end oil that the industry requires. Training will be performed on site and will include all processes as well as detailed SOP's for cold soaking, tincture recovery, filtration, ethanol recovery, decarb, distillation, degumming, winterization, brine washing / ph balancing, color remediation, and pesticide remediation.
