Furués 200 thc to thca + New Topic Relevance Sort by 50+ results for thc to thca How do you make large THCa Crystals, THCa Recrystallization? ■ Hash and Stuff ■ THCa Crystallization Jun '20 - great there is a THCa thread already  $\bigcirc$  METHODS FOR OBTAINING PURIFED CANNABS EXTRACTS AND THCA CRYSTALS https://patentimages.storage.googleapis.com/24/14/ae/b824348da3e5ee/US20170008870A1.pd f patentimages.storage.googleapis.com https://patentimages.storage.googleapis.com/24/14/ae/b82... Industrial Hemp THC LIMIT (the vs thea vs the+thea) Hempire Building Jan '19 - I have been noticing many hemp flower brands claiming below .3% the as being under legal limit while posting test results with over .4 - .6% THCA. Does anyone know how legal the limits are being considered? Delta 9 thc vs thca vs thc+thca combined Seems like most hemp flower brands are claiming d... Post Your THCA Pics/Vids ■ Hash and Stuff ■ THCa Crystallization Aug '19 - Consider the basic principles of crystallization, at least the methods used in cannabis. You need a super-saturated solution of THCA, and you need it to be (fairly) clean. I'f you're using a waters then I suspect you have a method and configuration where you ate attempting to fractionate your ext... US20170008870 Thea Crystallization Patent ■ Hash and Stuff
■ THCa Crystallization Mar '18 - take 100 grams and add to approx 500ml hexane isomers, direct from any extraction. non decarbed and non winterized, however winterized can be used. but virgin extract is preferred. take 500ml distilled water and add sodium hydroxide until ph of solution rises to 13. now take the dissolved hexane ... THCa diamonds technique ■ Hash and Stuff
■ THCa Crystallization diamonds processing crystallization Dec '19 - Posting this to see the variations in technique and SOPs when it comes to THCa crystallization. I have made diamonds with and without CRC. Interested in hearing from people who do and people who don't. My process for NON CRC crystallization is as follows and will cover where temperature variation... THCa, A and B Hash and Stuff THCa Crystallization Mar '18 - These are Positional Isomers because they only differ by the placement of the carboxylic acid functional group on the benzene ring, either at the 2 (THCA A) or 4 (THCA B) position. In theory, there could be a 2, 4 dicarboxylated version of THC. THCA B is pretty rare in nature, so a doubly carboxy... ChaseYooth's THCa experience ■ Hash and Stuff ■ THCa Crystallization Nov '18 - Hey guys, @ChaseYooth here. Aka Chonkski 🙂 I posted a bit of this experience on my feed the other day, but as promised, I have been wanting to get the conversation started here on the forums. So I'll just start by transparently walking through my steps taken... I basically started with... CBDA to D9 THCA ■ Hash and Stuff ■ Pre/Post-Processing cbd the conversions 7d - I've made this before, something like two years ago. Another project just on the shelf, unfortunately. But, if no one has mentioned, when you cyclize CBDA you make both forms of THCA (THCA-A and THCA-B or so-called abnormal THCA) depending on which -OH is cyclized. Take a look at the CBDA molecul... D8 D10 and 99.9% CBN Kilos. Wondering what going rates are currently and if there's an interest in any of those? Thoughts? ■ CannaBusiness d8 cbc d10 Sep '19 - The subject of this issue is  $\Delta 9$ -tetrahydrocannabinolic acid ( https://hightimes.com/guides/what-is-thca-crystalline/ THCA), which occurs naturally in the plant. THCA needs to be heated so it changes into https://hightimes.com/health/science/thctetrahydrocannabinol/THC, the active form that ge... Coagulating fats vs Cold crashed thca ■ Hash and Stuff
■ THCa Crystallization thca winterization Nov '19 - Hi there! This is my first post after a lot of reading. I fucking love this forum. Been growing and tinkering for 15 years and I've never seen a community as good as this onethe the three thre [Heat+Pressure]-Only Solventless THCa Crystallization Possible? ■ Hash and Stuff ■ THCa Crystallization Nov '18 - Hello Future4200! I'm a new comer to F2400 this place is AMAZING!... here goes a couple months of my life ... down this rabbit-hole I go 😃 I should preface this by saying I have a very limited background in Chemistry, and overall a n00b. So my question is : so theoretically speaking, for a ... Shatter turning into sugar wax thca? В ■ Hash and Stuff
■ THCa Crystallization thca sugar Jul '19 - When shatter sugars is it turning into thca? The Terps leak out and left with thca sugar? "Jar-Tech" THCa Diamonds ■ Hash and Stuff ■ THCa Crystallization Nov '20 - Also check this category for all the THCa diamond info: https://future4200.com/c/hashand-stuff/thca-crystallization/20 Refining THCA Isolate? ■ Hash and Stuff
■ THCa Crystallization Jan '20 - I saw a really cool heat gun at my buddies place the other day that had digital temperature control and you can set exact degrees for it to come out. Still, you'd have to get the wax to melt and act as a solvent for the THCa if you'd want to melt the THCa without decarbing it. The melting point o... THCA/CBD glass-state science in Shatter (need chemist's help) ■ Testing and Analytics cbd shatter thca May '20 - VintageCharles: Are you suggesting that THC (not THCA) can form glass-like shatter states but not lattice-structured crystals? To my knowledge this is incorrect. I am fully under the impression that decarbing Shatter to THC is a non-reversible process that permanently alters the physical consiste... How much THCa does it take ?? ■ Hash and Stuff
■ THCa Crystallization Dec '19 - What percentage THCa does it take to make stable shatter and at what relative terp percentage and THC percentage? I've been running what I think is "perfect product" as far as duff goes. Hitting it with T5 S60 T41. I haven't gotten stable out the oven @85° shatter since before starting us... Beyond CO2 density, "vapor pressure" method boosts THCa throughput ■ Hash and Stuff
■ Extraction extraction the co2 thea supercritical Dec '20 - The typical, legacy approach ("density method") to increasing the rate of extraction of THC with supercritical CO<sub>2</sub> is to make THC more soluble by increasing CO<sub>2</sub> pressure and thus solvent density. Unfortunately, this also solubilizes a lot more of the undesired compounds which must be remediated p... Is this thea or fats/wax/lipids? ■ Hash and Stuff
■ THCa Crystallization Dec '20 - I think that much tane would dissolve the thea if that was thea, but im not completely sure just throwing logical darts in the dark lol Unknown White Powder Isolated from THCa Crystal Growing ■ Hash and Stuff
■ THCa Crystallization Feb '20 - I'm hoping the infinite wisdom that is F4200 could help me elucidate an unknown, beautifully fine, white powder that I have been reliably isolating while attempting to access THCa crystals from ethanol extract. Please let me know if you have any thoughts on what this material might be, I'd really... THCA vaporization:carts vs rig Hash and Stuff Vape Carts Jul '20 - Hello, I was having a debate about THCA and thought I should ask what you guys think. We have a pen cartridge that is made from bho that has been decarbed. The pen was not decarbed all the way, it was 50% delta9 and 25% THCA. My colleague tried the pen and said that it was not very strong, because ... badder chips / thcA ■ Hash and Stuff ■ THCa Crystallization Jul '19 - It will have thcA in it, if it's not old AF. But it shouldn't be all thcA, it should be full spectrum still right I re-ran some bad wax and made THCa isolate. Why? Hash and Stuff Extraction bho isolate Jun '19 - Thanks for the response Hairetsu, and forgive me for my grammar. "Made" implies a lot more cool things happened that actually didn't. I think your "wash" description was more accurate. That was my best guess as well for the THCa left behind. Unfortunately the THCa was riddled with viton bits... so ... Making thea derivatives in order to obtain pure the ■ Hash and Stuff
■ THCa Crystallization Mar '18 - The idea is to make a derivative salt out of thea that can be crystallized easily to nearly pure then cleave the addition to make pure thea or the "In general the purity of this crude crystalline ester will be well over 90% pure. About 70 to 80% of the initially assayed cannabinoid can be obtain... Reversing decarboxylation: **THC to THCA** method ■ Hash and Stuff
■ THCa Crystallization 3h - I typed the to the on the search bar of this forum and found nothing... So this motherfucker made his efforts!! Strange peak after thca ■ Hash and Stuff
■ THCa Crystallization 15d - Would that make it D8 THCA? Recommended Minimun Amount of Material For THCa? Hash and Stuff THCa Crystallization Mar '19 - @Stone : First you have to grok the alchemy behind that transformation. can you tell me why you want the Acetate? Assuming you're actually trying to make the acetate (which I doubt), you ought be able to find the relevant threads, and the appropriate data in the data dump. I suspect you're just ... Solventless THCA Crystallization Rosin ■ Hash and Stuff
■ THCa Crystallization Mar '19 - I know of (and have done) the mechanical separation method but I can not find much information on the rosin jar tech (see rosin.ryan om instagram). From the comments he has answered I think he presses at 220° then collects into mason jar, then places in toaster oven at an undisclosed temp for an ... Biosynthesis CBDA to THCA during curing ■ Data Dump ■ Cannabis Papers thca cbda conversion Nov '20 - ok, so you're citing Leafly. that's part of the problem. you're also reading ... the conversion of non-psychoactive cannabinoids to THCA will continue... and have substituted "CBDA" for "non-psychoactive cannabinoids". CBDA is generally considered non-psychoactive, but it is by no means the only non-... ReXing THCa in pentane Hash and Stuff THCa Crystallization Oct '20 - Background: Extraction is usually done in isobutane using a 2 stage CRC protocol. The 1st stage going into the collection vessel 2nd stage when a product is moved from the collection vessel to honey pots. In this Instance stage 1 media was reaching saturation so this fraction was dumped into a sma... THCa isolate from 2015 CannaBusiness thc isolate thca Feb '20 - Had this lying around for 4-5 years. I can't believe I found this laying in a box of old forgotten terpenes. still looks almost as good as the day it was produced. this strengthens my theory that THCA degradation and conversion to new Cannabinoids is caused by the lipids, terps and oil of the pla... **THCA** Diamond harvesting Hash and Stuff THCa Crystallization Mar '20 - What's up guys. I was just wondering, for those who make ReX diamonds. What's your preferred method of harvesting? Asking because I use tools I have in the lab and I find that I have a lot of powdered the left over after I'm done breaking the diamonds from vessel. Any good advice to prevent the ... Crashing out THCa in a pyrex Hash and Stuff THCa Crystallization Nov '19 - The tek I used was with https://www.amazon.com/gp/product/B005JCZ0FE/ref=ppx\_yo\_dt\_b\_asin\_title\_o01\_s00? ie=UTF8&psc=1 these pyrex pans with lids . You may lay a parchment down if you'd like. You can pretty much cross apply jar tek temps and handling with pan tek, the only difference is residual s... Making THCA isolate help. ■ Hash and Stuff ■ THCa Crystallization Oct '19 - I currently work in a lab that makes distillate. The head guy here went bonkers and was asked to leave. Now the owners want us to stop making distillate and make either THCA isolate or diamonds. I am looking for the quickest method possibly to do either of the above. If anyone could help me out s... **THCa Washing** ■ Hash and Stuff
■ THCa Crystallization May '19 - Hello everyone. I'm curious if anyone has any insight on a really clean and effective washing method for washing HTE from my THCa Diamonds. RotoVap SOP needed for thca ■ Hash and Stuff
■ THCa Crystallization Jul '18 - Need some help with parameter settings on my RotoVap. Specifically to preserve thea while removing ethanol. What is the best bath temp, vacuum depth (torr) and duration in roto? Any help is appreciated 🙀 High levels of THCa in my finished distillate ■ Hash and Stuff
■ Help Support and Requests Mar '18 - What levels of THCa are we talking about? It's inevitable that there will be trace levels of carboxylated cannabinoids in even a distilled product. Thermal decarboxylation becomes exponentially more difficult as the reaction continues. I've had distillate tested numerous times on TLC plates and t... THCa - Complete List of SOP's and Tek's ■ Hash and Stuff
■ THCa Crystallization Jan 16 - ~ https://future4200.com/t/only-the-strong-sauce-tek/44/2004 ~ https://future4200.com/t/jar-tech-thca-diamonds/112576/29 ~ https://future4200.com/t/indofabsc-r-c-bho-color-remediation-tek-sales-indofabsolutions-com/10028 THCA standards decarboxylating on HPLC Column? ■ Testing and Analytics hplc Nov '20 - Hey guys, Long time reader/first time poster. I have had an in-house HPLC for lab testing for a few months and have ran ~100 samples and 5 successful calibration curves so far. Today I prepped a new calibration curve and a new mobile phase (20mM Ammonium Formate/0.1% Formic Acid). When I ran the ... So am I stupid and misinterpreting the law, or is high THCa "hemp" ok now? ■ Hempire Building ■ Compliance Jun '20 - Correct all of the state laws with thea grey areas will soon be subject to change . The thing is that the readily converts to delta 9 with just time so its really not that great of a loophole . Its like saying i have 99% thca diamonds fully compliant less than .3% delta 9 . In oregon it has been... Thca ■ Hash and Stuff
■ THCa Crystallization extraction Nov '20 - Appreciate the sarcasm guys THCa Expert Badge Discussion ■ Meta ■ Site Feedback Oct '20 - This is not fair ... There are people here with THCa in abundance and could possibly start growing a stone and just keep adding to it so it never stops growing ... In the music video @Killa12345 added in another post, the young gentleman was singing about Colour, Cut and Clarity. So really the THCa e... What's the going rate for pure unflavored kilos of 99% THCA wholesale? And are there any reliable vendors? ■ CannaBusiness isolate thca wholesale May '20 - I realize most folks producing THCA formulate it into something or never remove the terpenes/minors because it sells i.e. diamonds, sauce, CRC type stuff etc. Generally, I see people using various chromatographic processes and hydrocarbon crystallizations so I don't expect the kilos they produce ... Hi guys need help pls thca ■ Hash and Stuff
■ THCa Crystallization Feb '20 - Im new to this . try to read every post about making diamond but im very lost with all those technic... need some help on how to start and basic thing i should know ... you can give a link to another post also ... im not afraid to read i want to acquire some knowledge . i try something today makes suga... How to convert THCA to CBN ■ CannaBusiness Feb '19 - Here is an interesting snippet about using iodine. We have heard of some studies using iodine, toluene and uv light to convert the into cbn. The article even mentions doing cbd-> cbn. (This might suggest that there is a conversion of cbd- > thc- > cbn) https://www.ncbi.nlm.nih.gov/pubmed/2924042... ▼ Top Threads of THCa Crystallization ■ Hash and Stuff
■ THCa Crystallization Jan '20 - Yes!! Pink THCa? CannaBusiness the cbn thea Oct '19 - Anyone notice the pinkish to purplish hue of the THCA on the left? My theory is the THCa converted to \_\_\_\_ cannabinoid. Anyone know what that cannabinoid could be? Most of it was a golden yellow but some of it looks that pinkish/purplish hue. The only solvent used was Butane. image image image Need a chemist to help me do a write up for state regulated THCA isolate ■ Hash and Stuff ■ Pre/Post-Processing Jan '19 - I am located in a state that does not allow for THCA isolate because they do not like pressure in non UL approved containers. I have a method that requires no pressure and in order to be the first in our state to make regulated THCA isolate I need the help of a chemist and engineer to write up my...
