Hi Matt,

Our analysts have reviewed and verified the data for this sample at this time. If you would you like to challenge the validity of this data, we can perform confirmation testing at the cost of two standard tests (depending on the sample available in retain we can perform one or two tests on this sample) and in standard turn time. We cannot expedite confirmation testing.

If you have any additional questions or concerns please let us know.

Kind regards,

Megan Moody

Hi Matt,

I have sent this to our analysts for data review. I will let you know when I have more information. Please let us know if you have any additional questions or concerns in the meantime.

Kind regards,

Megan Moody

Good Morning Botanacor,

We noticed the total THC was 0.00% on our Fire Cherry 308 306 and need to confirm the accuracy of this specific (plant potency) test. Please confirm the validity of this test at your earliest convenience. Thank you.

Best Regards,

--
