

THE PACT ACT

What is the PACT Act?

The Prevent All Cigarette Trafficking (PACT) Act was intended to prevent illegal tobacco sales and tax avoidance and the shipping of cigarettes and smokeless tobacco products directly to consumers via the United States Postal Service (USPS).

The 2021 PACT Amendment

As part of the COVID-19 stimulus relief legislation signed into law in December 2020, the PACT Act was amended to now include electronic nicotine delivery systems (ENDS). Under the amendment, vape companies appear to be prohibited from shipping vaping products via USPS. All major U.S. parcel carriers (UPS, FedEx, DHL, etc.) have also agreed to honor the PACT Act and prohibit shipping vaporizer components via their services.

An ENDS product is defined by the law as "any electronic device that, through an aerosolized solution, delivers nicotine, flavor, or any other substance to the user inhaling from the device [including] an e-cigarette; an e-hookah; an e-cigar; a vape pen... and any component, liquid, part or accessory of a device...without regard to whether the component, liquid, part, or accessory is sold separately from the device."

How has this impacted Jupiter and our customers?

Jupiter will continue to have methods of shipping to our customers, but there will be immediate changes:

Changes apply to the continental U.S.

Minimum Order Quantity to receive free freight: 10k cartridges with mouthpieces, 5k of power supplies, all-in-ones, and Klik, or a combination of the two.

An order of less than the MOQ volume will be subject to a \$300 freight surcharge.

Limited access to expedited freight (next day air, 2-day air, 3-day guaranteed, etc).

Order pick-up at Jupiter HQ in Phoenix, AZ will continue to be available to all customers.

Hawaii, Alaska, and Puerto Rico will require actual shipping quotes for each order regardless of quantity.

Has this change gone into effect yet?

Yes. This went into effect on April 2021 and was updated January 2022.

What can I do about this change?

Many groups and coalitions, including the Cannabis Voter Project, are demanding adjustments to these regulations and limit restrictions on the vape industry as a whole. Visit p2a.co/FyUcHvR to learn more.
