

# THC-X

PATENT PENDING

## THREE THC-X BLENDS *Choose your chill*

THC-X is a mixture of 3 different **NEWLY DISCOVERED** and patent pending Delta 8 THC esters. These 3 esters are:

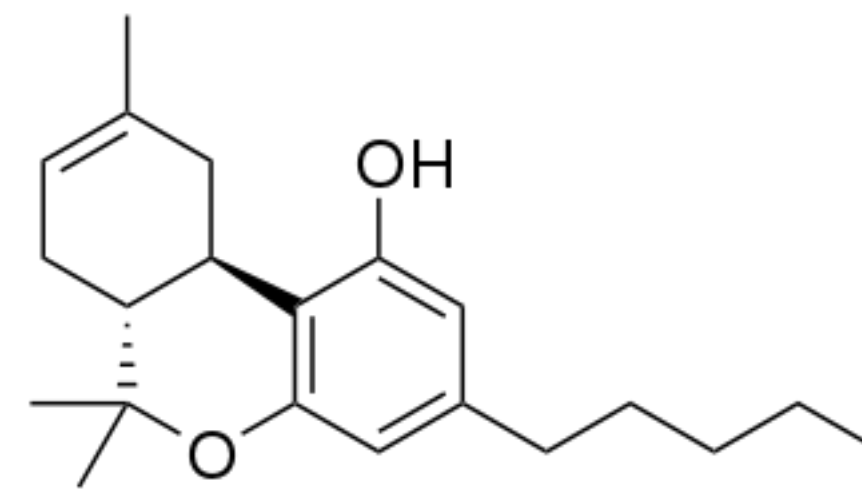

1. Acetoacetic

2. Butyric

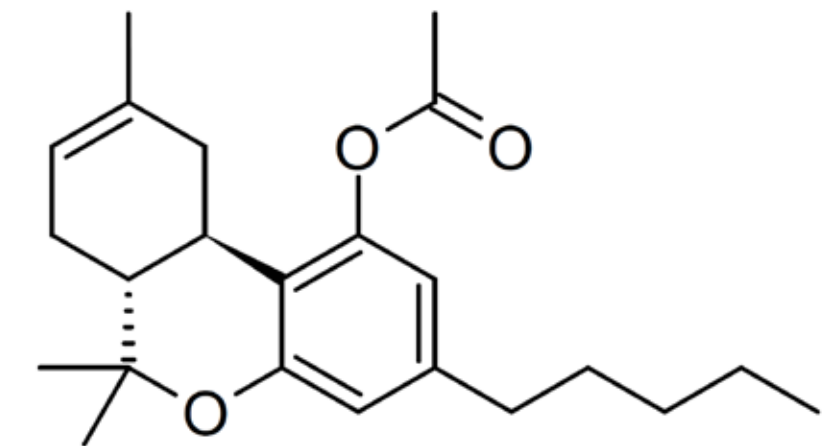

3. Isovaleric

Much Like THC-O is a 2-carbon chain ester of THC, THC-X Esters have 4 carbon chains and therefore complex exceptionally well, making them considerably faster acting, and with different more euphoric effects. This also gives them complexation states helping the other cannabinoids or molecules in a product have greater impact, carrying them through the body quicker and hitting the target faster.

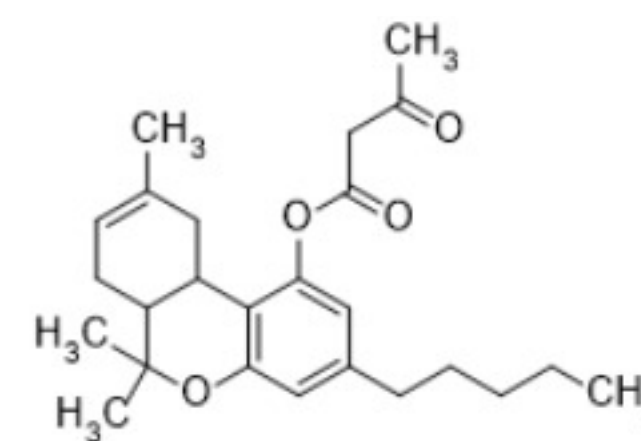

The mixture of these 3 new cannabinoid molecules are mixed in different quantities to give the desired Indica, Sativa or Hybrid effect. All the Molecules along with other cannabinoid esters are Patent Pending by Hempti and will be exclusively for use in Frozen Fields products.

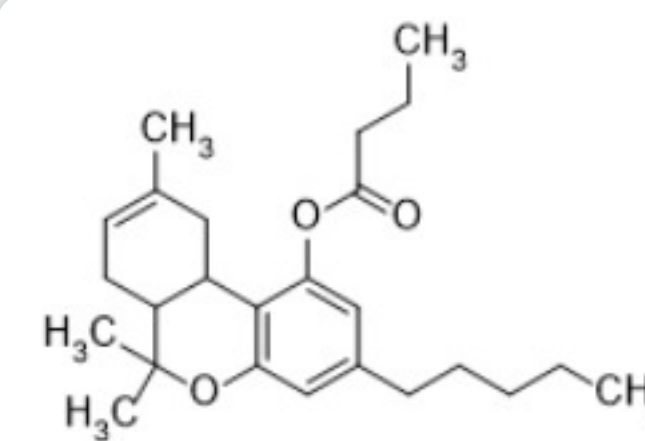

Standard Delta-8 THC Molecule

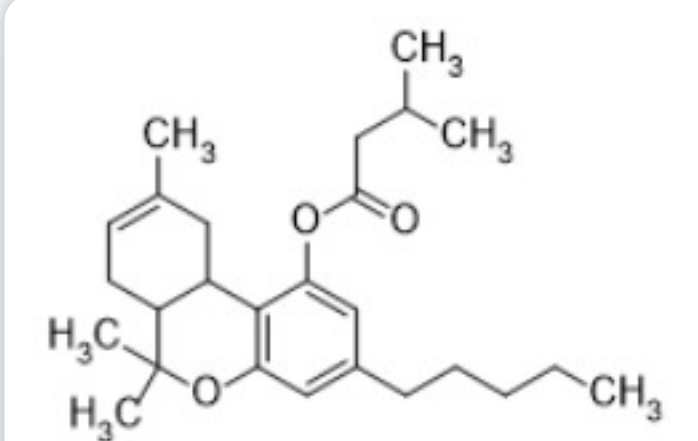

Delta-8 THC-O Molecule

Delta-8  
Tetrahydrocannabinyl  
Acetoacetate  
(D8 THC Acetoacetate)

Delta-8  
Tetrahydrocannabinyl  
Butyrate  
(D8 THC Butyrate)

Delta-8  
Tetrahydrocannabinyl  
Isovalerate  
(D8 THC Isovalerate)

PATENT PENDING

THREE THC-X BLENDS  
*Choose your chill*

Frozen Fields developed this Patent Pending, highly bio-available form of Delta-8 THC just for you. We then added our Fresh Frozen Live Resin, grown in Oregon to create this unique concoction.

## Sativa

Fast acting, very uplifting. This one hits fast with a profound sense of energy – a friendly blast of get up and and go – before you settle back into a richly rewarding high.

## Indica

Euphoria followed by nice and mellow. Irresistible Indica brings the feel-good factor as you take the colorful chairlift up Mount Euphoria before floating into fluffy clouds of chill.

## Hybrid

Hits in a flash, gives the world definition. Our hybrid is like a magical elevator. It arrives super quick and then takes you up, giving you an awesome view. This one paints the world with color.
