BBTANK[®]

BBMESH COIL

BBMESH Coil - large surface area, maintaining uniform heating.

Faster heating up: work at a quicker rate, offer a more effective and stronger hit, and deliver a better flavor and vapor.

More excellent flavor delivery and vapor production: with larger surface area, provide a better taste of the oil and massive vapor.

Consistency: cover the whole surface area of the ceramic, promote the even heating of the oil and ensure that all the hits are the same.

CUSTOMIZATION & BRANDING

We offer custom branding options for the IRY POD:

- Custom patterns on the middle surfaces
- Multiple body colors by oxidation
- Various tank window shapes
- Different oil holes and heating resistance

Filling instructions

Filling:

1. Lean the Pod with a little angle and fill it from any of the 2 hole beside the middle airway.

Tips:

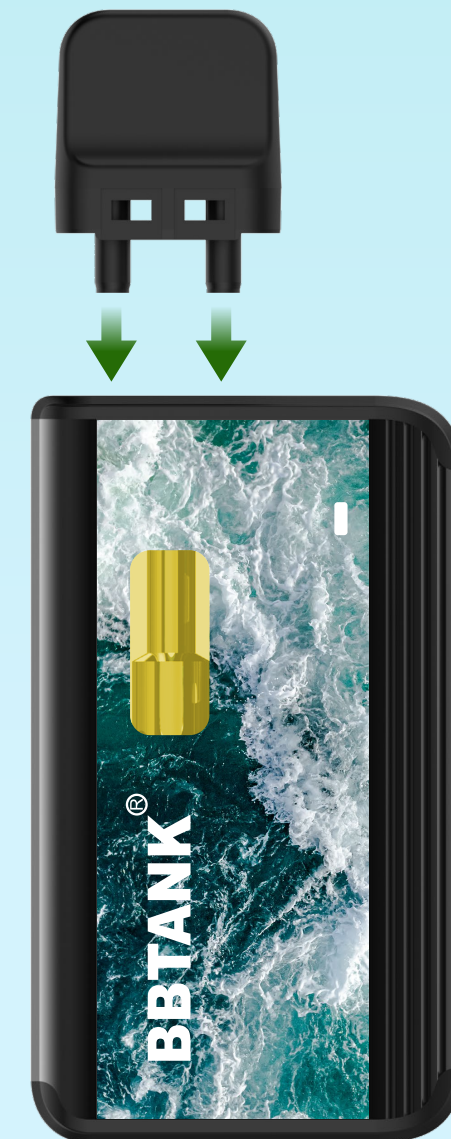

- a: Don't fill too full and refill
- b: Might need to warm up the oil before filling
- c: Don't fill in the middle airway

2. Snap the top on within 30 seconds after filling.

Tips:

- a. Failure to snap the top on time may result in leaking
- b. Failure to snap the top tightly may result in leaking

3. Wait for 30 minutes then enjoy.

Tips:

- Oils with higher viscosity may take more time

One-stop service: packaging

An appropriate bundling around your vape device can not only keep it sheltered, but also have your brand advertised through the printed logos on the packaging.
