

Cold Press Extraction

Homogenized Hemp Oil Production

Disclaimer

The purpose of this presentation (the "Presentation") is to acquaint and familiarize certain prospective investors and business associates with information related to the cold press extraction technology. This Presentation is confidential and private. Distribution is restricted. It may not be reproduced, copied or replicated in any form including print and digital media without the express and written authorization by the original author, who can be reached via the contact information contained herein.

This Presentation is and at all times shall remain the exclusive property of the original author. You are responsible for protecting the confidentiality and propriety of the information contained in this Presentation. Improper disclosure may harm the owner and you will be held responsible for damages resulting from an improper disclosure on your part.

The views contained herein contain information derived from publicly available sources that have not been independently verified. No representation or warranty is made as to the accuracy, completeness or reliability of the information. This Presentation should not be relied upon as a recommendation or forecast.

This Presentation contains forward-looking information within the meaning of applicable Canadian securities legislation relating, but not limited to, any expectations, intentions, plans and beliefs.

The forward-looking information or language suggesting future outcomes or other expectations, plans, beliefs, objectives, assumptions, intentions or statements about future events contained herein reflect the author's current views with respect to future events and are subject to known and unknown risks, uncertainties and assumptions. Many factors could cause the actual results, performance or achievements to vary from those expressed or implied by such forward-looking information.

Should one or more of these risks or uncertainties materialize, or should assumptions underlying forward-looking statements prove incorrect, actual results may vary materially from those described herein as intended, planned, anticipated, sought, proposed, believed, estimated or expected. Readers are cautioned not to place undue reliance on forward-looking information as it is inherently uncertain and no assurance can be given that the expectations reflected in such information will prove to be correct. The forward-looking information in this Presentation is made as of the date hereof and, except as required under applicable legislation, the author assumes no obligation to update or revise such information to reflect new events or circumstance.

Machine Specs

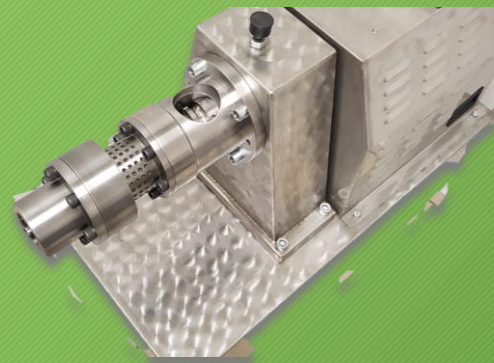

Height: 100cm

Width: 90cm

Depth: 47cm

Weight: 125kg

Screw: 70mm

3 Horsepower Screw

Single or 3-Phase Electricity

1.5 kilowatts of power at 240 volts

Medical-Grade Surgical Steel

FDA now requires
medical-grade surgical
steel for cannabinoid
extraction

Food-grade stainless
and high-carbon steel
are no longer
permitted

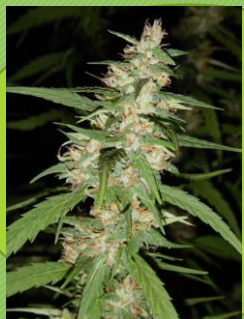

Oil Production Volume

Mix Material

2x
Seed

1x
Flower

Per Hour Output:

10 kilos
Mix Material

2 litres
Homogenized Oil

Meal Production Volume

75% of Mix
Material
returned as
Meal

Protein-rich
Meal retains
15% of the
plant's
cannabinoids

10 kilos
Mix Material

7.5 kilos
Meal

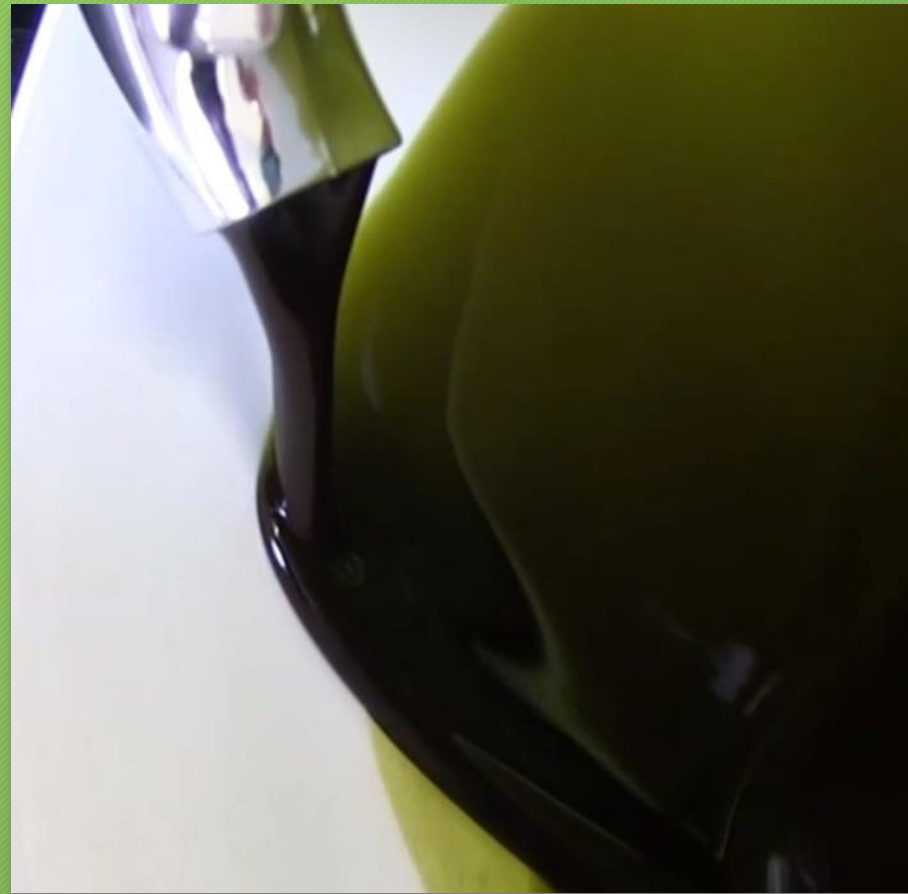

Volume Production

*Minimum Purchase: 5 presses

Homogenized Oil

Why Homogenization?

- ✓ Molecular-Emulsification
- ✓ 100% Water-Soluble
- ✓ Greater Bio-Availability
