

"A core pioneer in hemp production, Oprima, Inc. is the primary global CBD manufacturer with complete cannabinoid solutions from seed to product."

- ✓ Lab Direct
- ✓ WA-IHRP Licensed
- ✓ 3rd party COA

At Oprima Inc., compliance and transparency is a priority. We make sure every single step of our manufacturing process exceeds industry quality standards. Look closely, and you'll see that we don't just follow the rules, we surpass them.

Our proprietary systems produce some of the most pure, scientifically advanced CBD on the market. From seed to product, our team treats each stage with the utmost care so we can deliver the highest quality product to our customers around the globe.

Before a CBD batch can be released for sale, we test it in our own facilities for potency, impurities, appearance, and other quality factors. But since we really want to make sure a quality product comes your way, we also send it out for third-party testing. If the batch doesn't meet our standards, it won't find its way to you.

## WHOLESALE BULK CANNABINOID PRODUCTS

## COMPLETE CANNABINOID SERVICES

At Oprima, we want to shine a light on the future and set standards for others to follow. Our vision for the CBD industry is heavy on compliance, transparency, consistency, and quality. We want to build a world where education, innovation, and safe production make CBD available to all. We're in this business to build lasting, trusting relationships with our customers. That's why we adhere to the strictest safety standards in the industry. We want to do it right, and we're committed to making our process transparent.

We understand excellent quality control is paramount to our customers well-being. Our products are formulated and packaged at a partnered GMP facility here in Washington State. A third-party certification program examined the facility where we formulate and package our CBD through an audit and inspection.

### White Labelling

[YOUR NAME HERE](#)

Whether you're hoping to expand your brand or just get started in the CBD industry, Oprima is here to help. With our White Labeling service, you'll find the same quality, consistency, and transparency you've come to expect from Oprima. Have confidence, sit back, and relax with quality White Label products, finished for you.

### Toll Processing

[OUR HELPING HAND](#)

Toll processing allows you to convert your raw hemp material into crude full spectrum hemp extract oil, distillate, and isolate. Toll processors dry, cure, and trim hemp biomass and flowers and then extract cannabinoids and terpenes. Farmers can then choose if they'll sell the extracts or have them manufactured.

### Toll Distillation

[FULL SPECTRUM](#)

Toll distillation services purify and select crude full spectrum hemp CBD oil into refined full spectrum hemp CBD distillate which can be sold or further processed.

### Toll Isolation

[+98.8% PURITY](#)

Toll CBD isolation services turn CBD oil or distillate into purified CBD isolate which can be sold or sent for contract manufacturing into finished products.

### THC Free Formulation

[BROAD SPECTRUM](#)

Toll THC Removal services use our proprietary process in order to remove THC from Full Spectrum distillate to achieve non-detectable THC (aka zero THC) product such as THC free distillate. The refined product can be sold or sent for contract manufacturing into finished products.
