  - 50ml - \$1250. (\$25ml)
- Email for larger order inquiries

For a limited time we are offering a value pack of samples. We will send you 5 1ml samples for only \$125 plus shipping!

### TAHOE OG "ESSENTIAL BLEND #1"

Hybrid:  
As is common with the OG strains this terpene is gassy and flavorful. Material was even sourced within 2 hours of Lake Tahoe!

### BLOOD ORANGE "ESSENTIAL BLEND #2"

Hybrid:  
Fruit forward with a bit of pepper. This is in short supply and is sure to impress due to its rich citrus flavor.

### GELATO "ESSENTIAL BLEND #3"

Hybrid:  
If you live in Ca youve had Gelato. This strain is a favorite amongst all cannabis lovers. I have not had this one tested yet, but will this week.

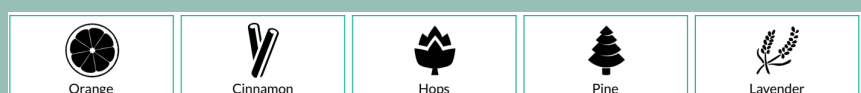

### LEMONATO "ESSENTIAL BLEND #4"

Hybrid:  
Citrus and sweet this strain is a cross between Gelato and Lemonchello. The Gelato gives body to the lemon flavor to make for a full palate experience.

### SOUR DIESEL "ESSENTIAL BLEND #5"

Sativa:  
Sour Diesel is a classic for good reason. Its medicinal qualities are hard to match when you are still looking to function! Fruity and earthy, this is sure to be a favorite for all.

# ROYAL TERPS

Our efforts toward bee conservation

*"Imagine a grey world without almonds, apples or fragrant flowers... Sounds terrible, right? Unfortunately, that's the shocking future we face if we don't work to help our most precious pollinator: bees. Far from being a niche concern, bees are at the heart of our survival. One in three bites of food we eat depends entirely on bees - and they are dying out. We donate to The Honeybee Conservancy which is a public charity that works to help bees, while increasing access to organic, sustainable food in under-served communities."*

## WE STARTED THIS BRAND TO MAKE A DIFFERENCE

We wanted to help bring people back to the cannabis plant and hence back closer to the mother. By providing quality products at affordable prices we believe that this change can and will happen in the industry if we all make a commitment to what we believe in.

We also want to give back to the nature that has provided us with this opportunity and the bees are a HUGE part of exactly that. So we donate 1% of our gross on every sale to [Thehoneybeeconservancy.org](http://Thehoneybeeconservancy.org) and give you an opportunity to donate at checkout. Whether you donate or not, we hope that our message will help you become more mindful of the problems that face us today with bee depopulation and hope that it inspires compassion and/or action!

## BEE SANCTUARIES

The nonprofit creates bee sanctuaries by placing solitary and honey bees in community gardens, urban farms, and parkland areas in the US and Canada. In these sanctuary sites, the bees pollinate locally grown food while serving as valuable environmental and educational resources for their communities. They also partner with forward-thinking organizations to create their own bee sanctuaries.

## OUTREACH

By creating events to inspire compassion and active participation in bee conservation we can help raise awareness of this growing issue and band together to make a very real change for this very real problem we face.

## LOCAL FOOD

From apples and squash, to buckwheat and coffee, bees are responsible for pollinating most of the fruits, vegetables, seeds, nuts, and grains that are essential to our diets. Honey bees in particular play a huge role in agriculture, contributing over \$15 billion to the value of US crop production.

## EDUCATION

Inspired by a love for bees and sustainability, the bee charity we work with has created this curated library of free bee lesson plans, activity sheets and educational materials for you and for students. We hope it inspires you to incorporate bees, pollinators and sustainability in classrooms.
